

LSD WALLPAPER

1969 Ongoing

Powder room. By name it's a euphemism for WC, a shortening for water closet itself another euphemism for restroom, still a different way to imply bathroom, which can be shortened to Loo, John, Head etc. Ours was a powder room and what a glorious psychedelic wallpapered refuge it was to "powder your nose". It's gone now destroyed by the evils of "redecorating" but before renovations start, I strip remnants in order to someday remake it, reprint it . . . This plethora of 60s magic. Wade Guyton's THE ROOM MOVED THE WAY BLOCKED, a piece made for one room, and one room only at The Dikeou Collection. It's a big in-between and it's not going anywhere . . . So it's the perfect place to reinstall that in-between, mind blowing, powder room wallpaper . . . "Come on Baby light My Fire."
